

## Village Green Center Subcommittee Descriptions

---

### The Leisurely Life (Parks, Trails, Open Spaces and Recreation)

**Summary:** One of the most important features a community offers to its residents is the amenities it provides. These amenities come in many forms, but mainly from natural assets or planned attributes like community parks, trails, open spaces, and recreation facilities. These community assets serve the interests of everyone living in a community – youth, young families, adults, and seniors.

As the Village population grows, the demands for new amenities and facilities increase with the expectations from more active and leisurely-minded population, regardless of age.

Providing these amenities is no small expense to a community, but this investment ensures a quality of life residents of all ages come to expect as they seek engaging activities they can enjoy at any stage of life throughout the four seasons.

**Focus:** This subcommittee will develop opportunities to enhance the active lifestyles of residents of all ages to enjoy year around.
